

PtInRegion

The **PtInRegion** function determines whether the specified point is inside the specified region.

```
BOOL PtInRegion(  
    HRGN hrgn,          // handle of region  
  
    int X,                // x-coordinate of point  
    int Y                 // y-coordinate of point  
);
```

Parameters

hrgn
Identifies the region to be examined.

X
Specifies the x-coordinate of the point.

Y
Specifies the y-coordinate of the point.

Return Value

If the specified point is in the region, the return value is TRUE.

If the function fails, the return value is FALSE.
